Penny,

In the last week or so more track athletes have been using the track between 3:30-5:30 when football practices. It becomes more of a safety issue when the athletic trainers move around to cover our areas and have to dodge and move around people on the track. Yesterday, there was a full fledged women's track practice with Ringo present. I spoke to him about it but am sure he will not listen to me. Also, there were several male runners as well but I could not find a men's coach present. We only have 2 weeks left and if you could please speak to Ringo and Dustin I would appreciate it.

On a side note, a few weeks ago a new men's assistant track coach moved our lift camera. I spoke to Dustin about it and he said he probably did not know any better. We have had problems with the camera ever since and it was inoperable yesterday for our practice. Any help would be greatly appreciated.

Thanks,

Jay
